Areas with the highest number of women with unmet need and the highest proportion of women with unmet need.

Areas with a high number of women with unmet need and a high proportion of women with unmet need.

Areas with a high number of women with unmet need but a low proportion of women with unmet need (may occur in areas with small populations of women with unmet need).

Areas with a low number of women with unmet need but a high proportion of women with unmet need (may occur in areas with small populations of eligible women).

These estimates are intended to be used as a rough guide to identify areas of potential need for services. References to "providers" are to entities with one Medi-Cal provider number - i.e., billing units, not clinic sites. Estimates are not precise, especially when pertaining to regions of small population. Neither OFP nor UCSF accept responsibility for accuracy of these estimates.
